---

Would you like a recycled Computer ?

We are a non-profit organisation that recycles Computers that has been donated to us by individuals, businesses and local authorities who would prefer to see this equipment recycled for community use rather than disposed of into landfill sites.

All our PC's machines are supplied with a fully licensed Operating System and with the additional option of open source software compatible with Microsoft Office. Our trained technicians clean and reprogram the Computers to high standards and PAT tested for electrical safety.

We supply refurbished Computers to Playgroups, Schools, Youth Clubs, Charities and other non-profit organisations. We also make them available to those on state benefits, disabled, pensioners, and schoolchildren with learning difficulties.

If you are interested in obtaining a Computer for yourself or a non-profit organisation, please contact us to find out what is currently available by telephoning us on 07880 793 077 on Monday to Friday between 10.00am and 4.00pm.
